

SPACE ONLY STAND BUILD RULES & REGULATIONS

All these guidelines should be followed in connection with the Technical Regulations of the venue. Informa Tech reserve the right to order and enforce changes to stand design

- All space only exhibitors are required to construct free standing partition walls between their own & adjoining stands. These must be to a minimum height of 2.5m (i.e. the height of shell scheme) and a maximum of **3.5m** (maximum stand height permitted).
- **NB.** Where partitioning walls are constructed over 2.5m in height, it is the responsibility of the exhibitor constructing the wall to dress the rear of the partition wall down to a height of 2.5m.
- Due to the low beams in the venue, no hanging signs or trusses (including lighting/projection support) are permitted above your stand.

- Platforms and raised flooring:
 - If you are including a platform or raised flooring on your stand, please note that if this goes above 40mm in height, a ramp will be required.
 - The platform or raised flooring height must be incorporated into your maximum build height.
 - If you include a ramp in your stand design, this must be incorporated into your space and must not intrude into the aisle.
- Walling off regulations:
 - Any walls built either within or on the perimeter of your stand, must be no more than **60% of each side** of the stand (excluding compulsory walling as specified above). If a wall is required to be longer than 60% of the perimeter, the additional walling must be no more than 1m in height

- All custom built stands must abide by the Health and Safety rules set out by the venue and Informa Tech. Failure to provide the required documents will prevent your stand being constructed.
- Exhibitor Appointed Contractors must follow any instruction given by Informa Tech and EESL, the official show contractor.
- All contractors must have successfully completed the venue's supplier approval process prior to the event.
